

I do not believe the NAB's should be able to dictate what service xm provides to its listeners. Being a truck driver I find that there local traffic and weather helps out by letting others and myself know whats going on around the city all the time. Unlike regular radio where you have to listen to endless commercialsand talking. They do not offer the same service as xm does so I say let them continue there service for those of us that don't want to hear all these commercials and talking.
